

Selenium Automation Scripts

Web test automation scripts built with **Python**, **Selenium WebDriver** and **PyTest**, using the **Page Object Model (POM)** design pattern.

Tech Stack

- Python
- Selenium WebDriver
- PyTest
- Page Object Model (POM)
- Git / GitHub
- PyCharm

What This Repository Covers

- Automated UI test scripts for web applications (for example Login, Registration and Shopping Cart flows)
- Locator strategies using XPath and CSS selectors
- Reusable page classes following the Page Object Model
- Test data handling with Excel files

Project Structure

Folder / File	Purpose
shopperstack/	Automation scripts for the ShopperStack application
Demotricentispages/	Page and test scripts for the demo application
FINAL MOCK/	Mock project automation scripts
Task/	Task and practice assignments
excel_file/	Excel test data
practice.py, soumith.py	Practice scripts

How to Run

1. Install Python 3.x and Google Chrome.
2. Install dependencies:

```
pip install selenium pytest
```

3. Run all tests:

```
pytest -v
```
